PART 1 REVIEWING THE FUNDAMENTALS.....1

1 *Cascade, specificity, and inheritance* 3

1.1 The cascade 5

Stylesheet origin 8 ■ *Inline styles* 11 ■ *Selector specificity* 11
Source order 16

1.2 Inheritance 19

1.3 Special values 21

The inherit keyword 21 ■ *The initial keyword* 23 ■ *The unset keyword* 23 ■ *The revert keyword* 24

1.4 Shorthand properties 25

Beware shorthands silently overriding other styles 25 ■ *Remember the order of shorthand values* 26

- 1.5 Progressive enhancement 29
 - Using the cascade for progressive enhancement* 29
 - *Progressively enhancing selectors* 30
 - *Feature queries using @supports()* 31

2 *Working with relative units* 35

- 2.1 The power of relative units 36
 - The rise of responsive design* 36
- 2.2 Ems and rems 37
 - Using ems to define font-size* 39
 - *Using rems for font-size* 43
- 2.3 Stop thinking in pixels 44
 - Setting a sane default font size* 45
 - *Making the panel responsive* 47
 - *Resizing a single component* 48
- 2.4 Viewport-relative units 50
 - Selecting from the newer viewport units* 52
 - *Using viewport units for font size* 54
- 2.5 Unitless numbers and line-height 55
- 2.6 Custom properties (aka CSS variables) 57
 - Changing custom properties dynamically* 59

3 *Document flow and the box model* 62

- 3.1 Normal document flow 63
 - Centering content horizontally* 65
 - *Using logical properties* 67
 - Adopting useful shorthand logical properties* 69
- 3.2 The box model 70
 - Avoiding magic numbers* 72
 - *Adjusting the box model* 73
 - Using universal border box sizing* 74
- 3.3 Element height 75
 - Controlling overflow behavior* 75
 - *Using alternatives to percentage-based heights* 76
 - *Using min-height and max-height* 77
- 3.4 Negative margins 78
- 3.5 Collapsed margins 79
 - Collapsing between text* 80
 - *Collapsing multiple margins* 80
 - Collapsing outside a container* 81
- 3.6 Spacing elements within a container 83
 - Considering changing content* 85
 - *Creating a more general solution* 86

PART 2 MASTERING LAYOUT91

4 Flexbox 93

- 4.1 Flexbox principles 94
 - Building a basic flexbox menu* 97 ▪ *Adding padding and spacing* 98
- 4.2 Flex item sizes 100
 - Flex basis* 102 ▪ *Flex grow* 102 ▪ *Flex shrink* 104
 - Some practical examples* 105
- 4.3 Flex direction 106
 - Changing the flex direction* 108 ▪ *Styling the login form* 109
- 4.4 Alignment, spacing, and other details 110
 - Understanding flex container properties* 114 ▪ *Understanding flex item properties* 116 ▪ *Using alignment properties* 117

5 Grid layout 119

- 5.1 Building a basic grid 120
- 5.2 Anatomy of a grid 122
 - Numbering grid lines* 127 ▪ *Working together with flexbox* 128
- 5.3 Alternate syntaxes 132
 - Naming grid lines* 132 ▪ *Naming grid areas* 134
- 5.4 Explicit and implicit grid 136
 - Adding variety* 140 ▪ *Adjusting grid items to fill the grid track* 142
- 5.5 Subgrid 146
 - Additional options* 150
- 5.6 Alignment properties 150

6 Positioning and stacking contexts 153

- 6.1 Fixed positioning 154
 - Creating a modal dialog with fixed positioning* 154 ▪ *Preventing the screen from scrolling while the modal dialog is open* 158
 - Controlling the size of positioned elements* 159
- 6.2 Absolute positioning 160
 - Absolutely positioning the Close button* 160 ▪ *Positioning a pseudo-element* 161

- 6.3 Relative positioning 162
 - Creating a dropdown menu* 163 ■ *Creating a CSS triangle* 166
- 6.4 Stacking contexts and z-index 169
 - Understanding the rendering process and stacking order* 169
 - Manipulating stacking order with z-index* 171 ■ *Understanding stacking contexts* 172
- 6.5 Sticky positioning 175

7 *Responsive design* 179

- 7.1 Mobile first 180
 - Creating a mobile menu* 188 ■ *Adding the viewport meta tag* 191
- 7.2 Media queries 192
 - Understanding types of media queries* 194 ■ *Adding breakpoints to the page* 197 ■ *Adding responsive columns* 200
- 7.3 Fluid layouts 202
 - Adding styles for a large viewport* 203 ■ *Dealing with tables* 204
- 7.4 Responsive images 206
 - Using multiple images for different viewport sizes* 206 ■ *Using srcset to serve the correct image* 207

PART 3 MODERN CODE ORGANIZATION.....209

8 *Cascade layers and nesting* 211

- 8.1 Manipulating the cascade with layers 212
 - Defining layers* 212 ■ *Layer order and priority* 216
 - The revert-layer keyword* 219
- 8.2 A recommended organization for cascade layers 221
 - Reset layer* 221 ■ *Theme layer* 223 ■ *Global layer* 224
 - Layout layer* 225 ■ *Modules layer* 226 ■ *Utilities layer* 227
 - Additional layers* 228
- 8.3 The :is() and :where() pseudo-classes 228
 - More forgiving selectors* 229 ■ *Manipulating specificity* 229
- 8.4 Nesting 230
 - Using the nesting selector* 231 ■ *Understanding the nuances of the nesting selector* 233 ■ *Nesting media queries and other at-rules* 235

9 Modular CSS and scope 238

9.1 Defining modules 239

Modules and global styles 240 ▪ *A simple module* 241
Variations of a module 242 ▪ *Modules with multiple elements* 246

9.2 Modules composed into larger structures 249

Dividing multiple responsibilities among modules 250
Naming modules 254

9.3 CSS scope 256

Scope proximity 258 ▪ *Scoping limit* 261 ▪ *Implicit scope* 264
Scope and layers 265

9.4 Pattern libraries 265

Using a CSS-first workflow 266 ▪ *Refactoring and breaking changes* 267

10 Container queries 270

10.1 A basic example of a container query 271

Using container size queries 274

10.2 A closer look at containers 276

Container types 276 ▪ *Container names* 278 ▪ *Containers and modular CSS* 279

10.3 Container-relative units 280

10.4 Container style queries 283

Decoupling a module from its container 284 ▪ *Reducing code duplication* 285

PART 4 VISUAL ENHANCEMENTS.....291

11 Color and contrast 293

11.1 Communicating with contrast 295

Establishing patterns 296 ▪ *Implementing the design* 297

11.2 Defining color 299

Gamuts and color spaces 306 ▪ *CSS color notations* 308

11.3 Using OKLCH to work with color 313

Switching the stylesheet to OKLCH 315 ▪ *Naming color variables* 316 ▪ *Selecting new colors for the palette* 318
Deriving colors from others on the page 318

11.4 Considering contrast for font colors 323

12 *Typography and spacing* 326

12.1 Spacing 327

Using ems vs. px 327 ▪ *Factoring in line height* 329
Spacing inline elements 333

12.2 Web fonts 335

12.3 Google fonts 337

12.4 How @font-face works 341

Font formats and fallbacks 343 ▪ *Multiple variants of the same typeface* 343

12.5 Performance considerations 344

The font-display property 346 ▪ *Variable fonts* 348

12.6 Adjusting space for readability 350

Body copy spacing 351 ▪ *Headings, small elements, and spacing* 353

13 *Gradients, shadows, and blend modes* 357

13.1 Gradients 358

Multiple color stops 360 ▪ *Color interpolation* 363
Radial gradients 366 ▪ *Conic gradients* 368

13.2 Shadows 370

Adding depth with gradients and shadows 370 ▪ *Creating elements with a flat design* 372 ▪ *Creating buttons with a hybrid look* 373

13.3 Blend modes 374

Tinting an image 376 ▪ *Types of blend modes* 377
Adding texture to an image 378 ▪ *Mix blend modes* 380

14 *Masks, shapes, and clipping* 383

14.1 Filters 384

Types of filters 386 ▪ *Backdrop filter* 387

14.2 Masks 389

Masking with a gradient 391 ▪ *Masking using luminance* 392
Other mask properties 393

14.3 Clipping paths 394

Polygon clipping paths 396 ▪ *Firefox clip-path tools* 397
Other clip-path types 399

- 14.4 Floats and shapes 399
 - Floating* 400 ■ *Defining a shape* 404

PART 5 ADDING MOTION409

15 Transitions 411

- 15.1 From here to there 412
- 15.2 Timing functions 415
 - Custom Bézier curves* 416 ■ *Steps* 419
- 15.3 Non-animatable properties 420
 - Properties that cannot be animated* 423 ■ *Fading in and out* 424
- 15.4 Transitioning to auto height 426
- 15.5 Transitioning custom properties 428

16 Transforms 431

- 16.1 Rotate, translate, scale, and skew 432
 - Changing the transform origin* 435 ■ *Applying multiple transforms* 436 ■ *Individual transform properties* 436
- 16.2 Transforms in motion 437
 - Scaling up the icon* 443 ■ *Creating “fly in” labels* 446
 - Staggering the transitions* 448
- 16.3 Animation performance 449
 - Looking at the rendering pipeline* 449
- 16.4 3D transforms 451
 - Controlling perspective* 452 ■ *Implementing advanced 3D transforms* 455

17 Animations 459

- 17.1 Keyframes 460
- 17.2 Animating 3D transforms 463
 - Building the layout without animations* 463 ■ *Adding animation to the layout* 466
- 17.3 Animation delay and fill mode 468
- 17.4 Conveying meaning through animation 471
 - Responding to user interaction* 471 ■ *Drawing the user’s attention* 475
